U.S. Output Gain Under Expectation

WASHINGTON (AP)—The nation's Gross National Product reached an annual rate of \$552 billion in the second quarter of this year, President Kennedy's Council of Economic Advisers reported today.

The second quarter figure was \$7 billion higher than the \$545 billion annual rate for the first quarter, but nevertheless fell well below the administration's hopes. It could have an important bearing on whether Kennedy asks for a tax cut this year to spur the economy.

Kennedy predicted in January the GNP for 1962 would jump to a \$570 billion rate for the full year compared with \$518.7 billion in 1961.

To have any chance to reach this figure, the second quarter rate should have been in the \$560-\$570 billion range.

The GNP, which measures the output of all goods and services, is one of the key economic indicators closely watched by all government and business economists.

The \$552 billion figure was a preliminary estimate by the council. These advance estimates, however, usually have closely approximated the final figure computed by the Department of Commerce.

Hate, Tragic Word, Says •Luther King

ALBANY, Ga. (AP)—A large-scale demonstration was reported in the works today as Negroes in this south Georgia community prepared to step up their anti-segregation activities.

The Rev. Martin Luther King Jr., of Atlanta, who has taken part in previous demonstrations and only this week was freed from a 45-day Albany jail sentence, rushed back from a planned trip to New England. His sudden change in plans came as a surprise to Connecticut Gov. John N. Dempsey and other dignitaries who had planned to welcome him to Hartford for a rally.

Police Chief Lauri Pritchett kept Albany policemen on the alert, lodging them in hotels so they will be quickly available in case of trouble. A contingent of state patrolmen also was kept at the ready.

Most of the anti-segregation demonstrations this week have involved teen-agers. Seven were arrested Thursday when they staged a sit-in at the lunch counter of a suburban drug store.

Cut Dollar Aid to Peru Dictatorship

By JOHN M. HIGHTOWER

WASHINGTON (AP)—The United States is cutting off aid to Peru in an effort to bring about an early return to civilian democratic government in the South American country.

Announcement of the cutoff of aid, except for relatively minor humanitarian assistance, came late Thursday shortly after the White House had denounced the military takeover in Lima as dealing a serious setback to the cause of democracy in the Western Hemisphere.

President Kennedy "has noted the developments in Peru with great concern," the White House statement said.

Washington officials said the drastic steps which have been taken by the administration to bring pressure on the military group which seized power in Peru Wednesday were considered essential to protect and promote broad Kennedy aims for all of Latin America.

At least one more U.S. action is in prospect—the suspension of sugar purchases from Peru at premium prices. Peru's annual quota of sugar sales to the United States at present is 190,000 tons.

Maj. Gen. Joe C. Lambert Adjutant General of U.S. Army, Washington Native

By MARY ANITA LASETER

Did you know that the Adjutant General of the United States Army is a native of Washington, Ark.? Major General Joe Calvin Lambert was born August 3, 1908 in Washington, one of six children. He was in the 11th grade graduation class of 1924 with William Ester, who supplied us with much of our information.

Since he was only 15 at the time he finished high school, his 16th birthday not occurring until August he lived in the area, principally in Texarkana, until 1925. That was the year he joined the army as a "buck private." Like most young people, he had ambition for advancement, but do you suppose he ever had the slightest idea he would be a general some day?

In talking with a sister, Mrs. Tom Rexroat, and a cousin, Pete Shields Jr., it was learned that the general worked hard to make his dream come true. And he succeeded too. Of course "a lucky break" always helps. In his case, it was "a lucky fall."

While stationed in Panama, he was in a small boat which was taking a group to shore from a large vessel. The waters were shark infested, and the boat capsized. Without hesitation, he saved one of the passengers as well as himself. It was the general's own daughter, and Lambert received his master sergeant's stripes for the deed.

The man who is a general now became a 2nd Lt. in the Reserve Corps in 1934 and was ordered to active duty in 1940. After holding a series of assignments at Fort Benning, Ga., and other posts, he was selected by the Army Ground Forces in 1943 for battle orientation with U.S. forces in Italy.

His services with the 14th Armored Division included being Chief of Staff before it was returned to the U.S. for inactivation in October.

Rockets to Leave White Sands Range

WASHINGTON (AP) — The Army has decided to test fire unarmed rockets over sparsely populated areas of the Southwest because the missiles have outgrown the White Sands testing range in New Mexico.

The test firings will begin in the middle of 1963. An Army announcement Thursday said the missiles will carry no explosives in their dummy warheads.

The White Sands test area has a maximum length of 100 miles, the Army said and that doesn't permit full-scale tests of its long-range rocket weapons.

Rockets would be fired from launching sites outside the test reservation, with White Sands as the target. On the way, the missiles would travel over areas with an average population of 1.5 people per square mile, the Army said.

Instrument sites are planned along the missile routes so that the test flights can be monitored and the rockets destroyed in the air if anything goes wrong.

Launch sites are being surveyed in the Blanding, Utah, area; near Ft. Wingate, N.M.; and around Datil, N.M.

Blanding is about 300 miles from White Sands. Ft. Wingate is about 200. These sites would be used for launches of the Pershing, the Army's longest-range tactical missile, which can cover about 300 miles.

Datil, about 70 miles from White Sands, would be used for test shots of the 75-mile Sergeant missile.

Forbid Union Cash Use in Fraud Trial

WASHINGTON (AP)—The U.S. Court of Appeals ruled today that labor unions may not use union paid attorneys or union funds to defend union officers charged with fraud.

The court unanimously ordered a U.S. District Court review of the question whether President James R. Hoffa and other Teamsters Union officials must reimburse the union for legal services in certain fraud charges cases.

The Appeals Court decision was written by Judge Charles Fahey with Judges Henry W. Edgerton and Wilbur K. Miller agreeing.

Newspaper Raises Fund for Blind

EL DORADO, Ark. (AP)—Nine-year-old Billy Bradley Jr. of El Dorado was blinded when struck by lightning while he was playing baseball.

Now he has hopes of regaining his sight. The El Dorado News-Times has asked for contributions to a proposed \$3,000 fund to pay for two operations for the boy.

His doctors say Bill will be able to see if the cataracts which formed over his seared eyes are removed.

Soviet Says Laos Peace Will Hold

By TOM REEDY

GENEVA (AP)—Soviet Foreign Minister Andrei A. Gromyko said today that the Soviet Union regards the Laos treaty as a guarantee of peace in Southeast Asia "and not only in that region."

Looking a bit tired, Gromyko landed here two hours ahead of U.S. Secretary of State Dean Rusk to take part in the 14-nation treaty signing and another round of big power talks on Berlin and disarmament.

He said the Laos accord would definitely establish the jungle kingdom as a "united, independent and neutral nation."

A large gathering of diplomats, including U.S. Ambassador W. Averell Harriman, were on hand at the airport for Gromyko's arrival.

Peering through horn-rimmed glasses at the prepared statement, Gromyko said the Laos agreement "proves that if the interested states really want to understand each other on questions which divide them they can accomplish it."

Gromyko noted a series of setbacks which had kept the Laotian pot boiling over the past 14 months. He said most of the obstacles were "artificial and put up by forces which cared little for the national interest of the Laotian people."

"All that is past now however," Gromyko concluded.

The American and Russian diplomatic chiefs appeared set for some blunt face-to-face exchanges on other cold war issues.

Laos' neutralist premier, Prince Souvanna Phouma, in a brief arrival statement said he thinks the example of Laos could be one that could help solve other international problems in the same manner."

Canadian Foreign Secretary Howard Green, arriving about the same time, said he thinks the Laotian settlement "will be very helpful in world affairs."

Canada is one of the members of the International Control Commission charged with supervising implementation of the settlement.

The United States said again today it may modify its position on nuclear test ban controls if such a change is found to be justified by new scientific findings.

U.S. Ambassador Arthur H. Dean made the statement in the American-British-Soviet test ban subcommittee of the 17-nation disarmament talks.

Referring to American tests which hold out hope of greatly improved methods of detecting distant atomic blasts, Dean told Soviet Deputy Foreign Minister Valerian Zorin:

"The United States is now evaluating and seeking further substantiation of these findings and will make in the near future modifications in its present position as they seem possible."

Dean had announced earlier outside the conference that the United States might drop its insistence on internationally staffed seismic detection stations on Soviet territory. This was in a statement he made Saturday on returning for resumption of the conference.

He had added the West would continue to demand that a test ban treaty provide for international inspection on the site of suspicious events in all countries, including Russia.

Before this offer was raised inside the conference that the United States might drop its insistence on internationally staffed seismic detection stations on Soviet territory. This was in a statement he made Saturday on returning for resumption of the conference.

He had added the West would continue to demand that a test ban treaty provide for international inspection on the site of suspicious events in all countries, including Russia.

Under the new proposal, the chief argument used to win support was that the bill was better than none at all. Failure to pass it would mean reverting to the 1958 program of unlimited production and high price supports that built up the present huge surpluses, the House was told.

The leadership bolstered by ranking Republicans on the Agriculture Committee, pleaded successfully against making any changes that might upset the delicate bipartisan agreement that

under both the corn and wheat programs that could be retired voluntarily in exchange for government payments would be increased from 40 per cent of the base acreage to 50 per cent.

The dairy provision would pay farmers up to \$2.50 for each hundred-weight of milk by which they voluntarily reduce production.

Celebrezze Confirmed by Senate

WASHINGTON (AP)—The Senate today confirmed President Kennedy's nomination of Mayor Anthony J. Celebrezze of Cleveland to be secretary of welfare.

Celebrezze, 51, a Democrat, succeeds Abraham A. Ribicoff, who resigned last week to run for the Senate from Connecticut. This is the first change in the Kennedy Cabinet.

The United States said again today it may modify its position on nuclear test ban controls if such a change is found to be justified by new scientific findings.

U.S. Ambassador Arthur H. Dean made the statement in the American-British-Soviet test ban subcommittee of the 17-nation disarmament talks.

Referring to American tests which hold out hope of greatly improved methods of detecting distant atomic blasts, Dean told Soviet Deputy Foreign Minister Valerian Zorin:

Jesus said, "Because you are lukewarm; and neither cold or hot, I will spew you out of my mouth," Rev. 3:16. If that's your bracket you better start getting up some temperature about life's values . . . home, children, school, church, God, right and wrong.

If Jesus died to save you, can't you do some living for Him? Do you believe, "Life is real, life is earnest and the grave is not its goal; dust thou art, to dust returnest, was not spoken of the soul"? Are you lukewarm? Why not get hot for God? Put righteousness first.

So They May See -- St. John 1:1-17 -- So They May Hear

IN THE BEGINNING was the Word, and the Word was with God, and the Word was God.

2. The same was in the beginning with God.

3. All things were made by him; and without him was not anything made that was made.

4. In him was life; and the life was the light of men.

5. And the light shineth in darkness; and the darkness comprehended it not.

6. There was a man sent from God, whose name was John.

7. The same came for a witness, to bear witness of the Light, that all men through him might believe.

8. He was not that Light, but was sent to bear witness of that Light.

9. That was the true Light, which lighteth every man that cometh into the world.

HE WAS IN THE WORLD, and the world was made by him, and the world knew him not.

11. He came unto his own, and his own received him not.

12. But as many as received him, to them gave he power to become the sons of God, even to them that believe on his name:

13. Which were born, not of blood, nor of the will of the flesh, nor of the will of man, but of God.

14. And the Word was made flesh, and dwelt among us, (and we beheld his glory, the glory as of the only begotten of the Father,) full of grace and truth.

15. John bare witness of him, and cried, saying, This was he of whom I spake, He that cometh after me is preferred before me: for he was before me.

16. And of his fulness have all we received, and grace for grace.

17. For the law was given by Moses, but grace and truth came from Jesus Christ.
